Art Unit: 1616

Claims 20-38 are pending in this application.

Restriction to one of the following inventions is required because the claims of this application lack unity of invention under 37 CFR 1.475 and PCT Rule 13.

- I. Claims 20-34, 36-38, drawn to composition, method of preparing the composition, method of enhancing efficacy of copper inorganic salt/oxide/hydroxide, and method of treating plants with copper inorganic salt/oxide/hydroxide in suspension in an aqueous emulsion containing at least one terpenic derivative.
- II. Claim 35, drawn to a method of preparing a composition containing copper inorganic salt/oxide/hydroxide in suspension in an aqueous emulsion containing at least one terpenic derivative, wherein a stable homogeneous suspension is ultimately obtained in which the "size of the particles is less than 6  $\mu\text{m}$ ."

The invention of Group I lacks unity of invention with Group II because the two invention groups are not so linked as to form a single general inventive concept. The two invention groups do not share a special technical feature, which special technical feature defines a contribution the invention, considered as a whole, makes over the prior art. The special technical feature that the invention of Group I claims to make over the prior art is in the combination of copper inorganic salt/oxide/hydroxide suspension in an aqueous emulsion of terpenic derivative. The special technical feature that the invention of Group II claims to make over the prior art is in the special method of preparing the composition so that all of the particles (i.e. not just copper substances) in a stable homogeneous suspension have a size less than 6  $\mu\text{m}$ . Therefore, the two invention

Art Unit: 1616

groups are not so linked to form a single general inventive concept, and the claims lack a unity of invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

A facsimile center has been established in Technology Center 1600. The hours of operation are Monday through Friday, 8:45 AM to 4:45 PM. The telecopier numbers for accessing the facsimile machines are (703) 308-4556 or (703) 305-3592.
